

# PhD PROGRAM SUSTAINABLE ENERGY SYSTEMS

*Be part of the transition to save our planet !*

As governments and businesses throughout the world are making carbon neutrality or net-zero pledges to avoid climate change catastrophe, JGSEE offers a newly revised program to prepare graduates to meet the challenges of energy transition to a low-carbon economy with the following key features:

- Areas of specialization: smart energy systems, renewable energy, energy efficiency, and energy policy, all in a sustainability perspective
- Multidisciplinary training with a whole energy system approach
- Intensive research training as well as professional development including entrepreneurship training

**APPLY NOW**

until June 30, 2022 for  
enrollment in Semester  
1/2022 starting on  
August 8, 2022.
